

The image shows a Visual Studio Code editor window with several tabs open: 'Welcome', 'main.py', '_init_.py', 'catalog.py', and 'admin.py'. The 'main.py' tab is active, displaying the following Python code:

```
1 from fastapi import FastAPI
2 from routes.catalog import router as catalog_router
3 from routes.admin import router as admin_router
4
5 app = FastAPI(
6     title="BookFlow Library API"
7 )
8
9 app.include_router(catalog_router)
10 app.include_router(admin_router)
```

Below the editor, the 'Terminal' tab is active, showing the output of a command executed in a PowerShell window. The command is `pip install fastapi uvicorn`. The output indicates that the requirements are already satisfied for the specified versions of the packages.
